

The combination of WIB evaluations and studies, available field data and practical experiences from members results in:

- Evidence of compliance with standards and specifications, through impartial and comprehensive evaluations in accordance with recognised standards;
- Purchasing decision making based on proven technology and fitness for purpose
- Avoidance of in-house evaluations; resulting in both time- and financial savings
- Capital- and revenue savings on buying and operating the most cost effective instruments;
- More effective process control resulting in reduced raw material costs, improved up-time and higher product yields;
- Reduction of risks of process failure and prosecution, through breaches of environmental emission limits.

All data and information supporting these objectives is now also available on-line to WIB members, through the WIB Forum.

The logo for the International Instrument Users' Association (WIB). It consists of the letters 'WIB' in a bold, white, sans-serif font, set against a dark blue background. The letters are slightly shadowed, giving them a three-dimensional appearance as if they are floating or attached to the surface.

Founded 40 years ago, **WIB**, the **International Instrument Users' Association**, a non-profit organisation, provides **advisory services** to Process Plant owners and Engineering Consultants around the world for the best selection of process instrumentation and control systems.

Application **experience** is circulated freely among members.

Over 1.000 reports on evaluations, assessments, guidance, comparative studies and surveys have been published in collaboration with laboratories and top specialists. These form the **knowledge** base that WIB builds on....

Areas of Interest:

- **Flow, Level, Temperature, Pressure Measurements**
 - **End Elements, Actuators, Valves**
- **Analytical Measurements**
 - **Process Control and Functional Safety**
- **Standards, Practices and related Legislation**

WIB Members are mainly Multinationals, but also Engineering Contractors and Medium -sized Process and Manufacturing Companies, who recognise the importance of **advisory services, experience** and **knowledge** for the correct choice of their instrumentation and process systems.

Be in control of your industrial processes:

The right decisions are based on reliable information !

What our members say:

"When selecting instrumentation at the cost of millions of dollars, WIB's services are our most reliable independent source of information and our safety net"

International Co-operation:

Further benefits are gained from co-operation on programmes, sharing of reports, etc. between **WIB** and similar organisations operating in the UK (SIREP/ Evaluation International) and in France (EXERA). Also, a co-operation covenant is in place with the German NAMUR organisation.
